۵	<p>C: Long comprehension. Read the passage carefully and then answer the questions. For a long time scientists have believed that life exists on other planets besides the earth. But until recently, they had very little evidence to support this theory. Not long ago, some pieces of rocks from outer space (meteorites) were discovered in Australia. This discovery has caused a lot of excitement among scientists throughout the world because these rocks contain chemicals similar to those found on the earth and in our own bodies. This shows some scientists that life, in some forms, is not only possible but also provable on other planets.</p> <p>C1: Answer the following questions. 57. Why couldn't the scientists say exactly that life existed on other planets? 58. What caused the scientists to be excited? 59. What do these rocks include? </p> <p>C2: True or False? 60. For a long time, scientists thought that there is life on other planets. 61. After some rocks were discovered in Australia, all kinds of people were excited.</p> <p>C3: Find the best choice. 62. According to the text, scientists had little evidence to a. discover some meteorites b. say that life exists on other planets c. indicate the part of rocks of the earth d. travel to the moon and other planets 63.
